Index to Volume 15

Authors

A

Atharton, John G. 173
Auger, John E. 101

B

Babrauskas, Vytenis 114
Baker, Quentin A. 106
Britton, Laurence G 128, 194

C

Chatrathi, Kris 237
Chopp, Robert 61
Crawford, K.C. 148
Csengery, L. V. 148
Cusick, T. M. 148

D

de Nevers, Noel 74
Desai, Vipul M. 166

E

Ebadat, Vahid 123
Emigholz, Kenneth F. 154

F

French, Raymond W. 48
Friedlander, Randal H. 18

G

Getz, R.C. 26
Going, John 237
Gowland, Richard 52
Guerra, Remeo 227

H

Hendershot, Dennis C. 213
Hauert, F. 178
Herrington, Edwin F. III 110
Howard, Walter B 185

K

Kletz, Trevor A. 5

L

Latino, Michael A. 159
Leung, Joseph C. 66
Lunde, Liv 32

M

Mannan, Sam 258
Melhem, G. A. 168
McCready, David 95
Moosemiller, Michael D. 61
Mulligan, James C. 123

N

Négyesi, György 42
Newhouse, Roland 1,121
Nyborg, Rolf 32

P

Parker, Jim 227
Perron, Michael J. 18
Pratt, Thomas H. 173

R

Radandt, S. 178

S

Sanders, Roy E 150, 189
Scheffler, Norman E. 11
Scheier, Ephraim A. 106
Shanley, E. S. 168
Sheffey, Joseph L. 230

Titles

A

Advanced Pilot Technology: Ignition, Flame Detection and Re-Ignition 227
Applying Inherently Safer Concepts to a Phosgene Plant Acquisition 52
Applying Risk Assessment Principles to a Batch Distillation Column 61

B

Boiler Incident Directly Attributable to PSM Issues 258

C

Carbon-Initiated Effluent Tank Overpressure Incident 148
Catastrophic Failure of an Ammonia/Air Mixer 89
CCPS Initiative to Assist Small and Medium Enterprises in Improving Their Safety Performance 9
CMMS: Five Steps to Ensure Workability 104
Comparative Examination of the Fire Performance of Pipe Insulation, A 114
Critical Elements in the Design of Piping Systems for Toxic Fluids 26

D

Decomposition Flame Propagation Limits of Ethylene and Mixture with Other Gases 128
Development and Communication of Worst-Case Scenarios for the EPA Risk Management Program 95
Dust Cloud Characterization and Its Influence on the Pressure-Time-History in Silos 178

E

CPI/HPI, The 18
EPA's Risk Management Regulation: Worst-Case Scenarios . . 101

F

Flame Propagation in Pipes of Pneumatic Conveying Systems and Exhaust Equipment. 219
Flare Deflagration Incident at Rohm and Haas, A 166

H

Hazard Rating System for Flammable and Combustible Liquids 230
Hazardous Waste 121
HAZOPExpert: An Expert System for Automating HAZOP Analysis 80
Human Factors: Case Histories of Improperely Managed Changes in Chemical Plants 150

I

Improving the Operator's Capabilities During Abnormal Operations; Observations from the Control House 154
Inherent Safety, Health, and Environmental (SHE) Reviews . . 48
Inherently Safer Design: The Growth of an Idea 5
Inherently Safer Latex Plants 11

M

Measures for Reducing SCC in Anhydrous Amminia Storage Tanks 32
Modeling of Panel Inertia Effects in Vented Dust Explosions Mode 247
Monday Morning Quarterbacking: Applying PSM Methods to Case Histories of Yesteryear 189

O

On the Estimation of Hazard Potential for Chemical Substances 168
Operating Atmospheric Vent Collection Headers Using Methane Gas Enrichment 194

P

Pipe and Duct Deflagrations Associated with Incinerators . . 237
Pressure Relief Consideration for Refrigeration Equipment . . 66
Procedure for Determining the Distribution Ranking Index . 159

R

Research Needs for Process Safety Technology 185
Risk Guidelines as a Risk Management Tool 213

S

Sensitivity of Non-Explosive Compounds to Friction Testing, The 42
Some Electrostatic Considerations in the Transportation of Flammable Liquids 173

T

Team-Based Approach to Mechanical Integrity Implementation, A 110
Testing the Suitability of FIBCs for Use of Flammable Atmospheres 123
Testing Transformer Oil 2

U

Utility and Energy Cost Containment 1

V

Vacuum Collapse of Vented Tanks 74
Vapor Cloud Expolosion Analysis 106

Subjects

A

Abnormal operations, improving operator's capabilities during 154
Advanced pilot technology 227
Ammonia
  air mixer 89
  storage tanks 32
Anhydrous ammonia storage tanks 32
Atmospheric vent collection headers, operating 194

B

Batch distillation column 61
Boiler incident attributable to PSM issues 258

C

Carbon-initiated effluent tank overpressure incident 148
Case histories of yesteryear, applying PSM methods to . . . 189
Catastrophic failure of ammonia/air mixer 89
Chemical plants, improperly managed changes in 150
Control house, observations from the 154
Computerized Maintenance Management Systems (CMMS) 104
Cost containment, utility and energy 1
Critical elements in the design of piping systems 26

D

Decomposition flame propagation limits 128
Deflagrations, pipe and duct 237
Design
  Inherently Safer 5
  of piping systems 26
Distribution ranking index, determining the 159
Duct and pipe deflagrations 237
Dust
  cloud characterization 178
  explosions, vented 247

E

Effluent tank overpressure incident 148
Electrostatic considerations in transporting flammable liquids 173
Energy cost containment 1
EPA risk management
  program 95
  regulation 101
Ethylene, flame propagation limits of 128
Explosion(s)
  analysis, vapor cloud 106
  vented dust 247

F

Fire performance of pipe insulation 114
Flame detection 227
Flammable
  and combustible liquids, hazard rating system for 230
  atmospheres, testing the suitability of FIBCs for use in . 123
  liquids, transportation of 173
Flame propagation 128, 219
Flare deflagration incident 166
Flexible Intermediate Bulk Containers (FIBCs), testing . . . 123
Friction testing 42

G

Gase(s)
  methane, vent collection headers using 194
  mixtures of ethylene and other 128

H

Hazard
  and operability (HAZOP) analysis 80
  potential for chemical substances 168
  rating system 230
"HAZOP*Expert*" system for automating HAZOP analysis . . . 80
Hazardous waste 121

I

Incinerators, deflagrations associated with 237
Inherently Safer
  concepts 52
  design 5
  latex plants 11

L

Latex plants, inherently safer 11

M

Mechanical integrity implementation 110
Methane gas enrichment 194
Mixer, ammonia/air, catastrophic failure of 89

N

Non-explosive compounds, sensitivity of 42

O

Oil, transformer 2

P

Panel enertia effects, modeling of 247
Pipe(s)
  deflagrations 237
  flame propagation in 219
  insulation, fire performance of 114
Pneumatic conveying systems 219
Pressure relief consideration 66
Phosgene plant acquisition 52
Plant(s)
  chemical, changes in 150
  phosgene 52
Pressure-time-history in silos 178

PSM (Process Safety Management)
issues 258
methods 189
technology 185

R

Refrigeration equipment 66
Risk management
assessment principles, applying 61
guidelines 213
program, EPA 95
regulations, EPA 101

S

Safety
effects of downsizing on 18
in the CPI/HPI 18
performance 9
SCC (Stress Corrosion Cracking),methods for reducing 32
SHE (Inherent safety, health and environmental) reviews . . 48
Silos, pressure-time-history in 178
Storage tanks, anhydrous ammonia 32

T

Tank(s)
overpressure incident 148
vented 74
Team-based approach to mechanical integrity implementation 110
Toxic fluids, design of piping systems for 26
Transformer oil 2

U

Utility and energy cost containment 1

V

Vacuum collapse of vented tanks 74
Vapor cloud explosion analysis 106
Vent collection headers, operating atmospheric 194
Vented
dust explosions 247
tanks 74

W

Waste, hazardous 121
Worst-case scenarios 95, 101

Statement of Ownership, Management, and Circulation (required by 39 U.S.C. 3685) of September 30, 1996, for *Process Safety Progress* Publication No. 689-410, issued quarterly for an annual subscription price of $195 from 345 E. 47th St.,New York, NY 10017, which is the location of its publication and business offices. The name and address of the Publisher, Editor, and Managing Editor are: Publisher, Stephen R. Smith, 345 E. 47th St., New York, NY 10017; Editor, T.A. Ventrone, 345 E. 47th St. New York, NY 10017; Managing Editor, Maura Mullen, 345 E. 47th St., New York, NY 10017. The owner is: American Institute of Chemical Engineers, 345 E. 47th St., New York, NY 10017. The known bondholders, mortgagees, and other security holders owning or holding one percent or more of the total amount of bonds, mortgages, or other securities are: None. The purpose, function, and nonprofit status of this organization, and the exempt status for federal income tax purpose have not changed during the preceding 12 months. The following figures describe the nature and extent of *Process Safety Progress*' circulation. In each category the first number (*in italics*) is the average number of copies of each issue during the preceding 12 months. The number next to it, within parentheses ( ), is the actual number of copies of the single issue published nearest to the filing date. Total number of copies printed (net press run), *2,268* (2,172). Paid circulation: 1. Sales through dealers and carriers, street vendors, and counter sales: None; 2. Mail subscription, *2,268* (2,172). Total paid circulation *2,268* (2,172). Free distribution by mail carrier, or other means; samples, complimentary, and other free copies, *50* (50). Total distribution *2,318* (2,222). Copies not distributed: 1. Office use, left over, unaccounted, spoiled after printing *637* (478). 2. Returns from news agents: None. Total *2,955* (2,700). I certify that the statements made by me are correct and complete.
Stephen R. Smith, Managing Director, Publications.
